CS110 / INDEPENDENCE ROAD

pitch / Jesse Sanchez

Issued: Nov 10, 2026, 2:49 PM Pacific

Record: FORM-D636DAF50BE9A089142ED912

Personal public verification code: VIEW-6251F303836BFC8A91BF2310

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: 33aab8f5a36c1972252da85bf29843a748be2134f1dd627a3cfed6942858a0e3

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

What do you understand about the work and finish line?

What I understood about today is that we must use all features taught to us in the videos because they will be the difference between a successful and not so successful game.

What will you contribute? Name a task or useful capability.

I feel like I bring to the team another member that can provide information regarding our game or even just someone reliable that can do any task and if I can't I will figure out how to complete it.

What needs research, support or practice?

Something I still struggle with would be coding on my own instead of having a template or even just copying the code from one place to another.

Your available work times and preferred contact method: Discord, email, text, classroom or other. Keep private addresses/numbers outside public exports.

Preferred contact: Classroom

I will be available either in the classroom or even by shooting me a message on discord.

List your project tools and why you need them.

Some of my tools that I will be using would consist of Microsoft Visual Studio and different AI sites such as Claude, Gemini, and Chatgpt.

Required: name the AI you will use, its project task and how you will verify its output. Use course-provided/shared or approved local access if needed; no personal or paid AI account is required.

AI: Claude

Task: This AI will help us with mainly coding for our project.

CS110 / INDEPENDENCE ROAD

Verification: By running different trials to see what may fit the best.
